

### **Manufacturing Engineer**

Requires a B.Sc degree in Engineering Technology or a relevant engineering field. Must be able to multi-task and work in a fast-paced environment to develop and manufacture materials for electronics and space propulsion applications. Responsibilities include: carry out daily manufacturing activities such as powder pressing, furnace operation, and running experiments and communicating results with other engineers and scientists. Familiarity with SolidWorks is a plus. US citizenship is required.

Sienna Technologies, Inc. offers an excellent wage and benefit package and the opportunity to work in a research and development, and manufacturing environment. Interested candidates should forward resume, including the names and phone numbers of 3 references, by Email: [humanresources@siennatech.com](mailto:humanresources@siennatech.com)
