Conflict Minerals Statement

“Conflict Minerals” refers to Tin, Tantalum, Tungsten, and Gold, also known as 3TG mined in the eastern provinces of the Democratic Republic of the Congo (DRC) and in the bordering countries where the revenues from the 3TG minerals may finance armed groups engaged in civil war of dire social and environmental abuses. The Dodd-Frank Financial Reform & Consumer Protection Act, section 1502(b) of July 2010 requires all US public companies and their supply chain to disclose the use of conflict minerals.

Even though Sienna Technologies, Inc. (STI) is not subject to SEC reporting, STI fully supports this legislation and our position is to avoid the use of all conflict minerals. Therefore, STI expects our suppliers are able to certify, or are in the process of certifying, that the materials they supply originate from legitimate, conflict-free mines in the DRC region.

STI has no indication that the products we supply have been sourced from conflict mines or smelters in the DRC or adjoining countries.

If you have any questions or concerns, please contact us immediately.

Sincerely,

Ender Savrun, PhD
President
