

Sienna Technologies, Inc. is a manufacturer of advanced technical ceramics, including but not limited to Aluminum Nitride ceramics, metalized ceramic components, ceramic components, and ceramic-metal assemblies for all scientific and industrial applications.

Sienna Technologies, Inc. strives to be the first-choice supplier in the markets it serves by providing world-class products and excellent service that are delivered on-time to customers. Sienna is fully aware that its success is created by supplying customers with products and services that meet and/or exceed their requirements the first time and every time.

At Sienna Technologies, Inc. we conduct our business according to our purpose and strategic direction. We:

- Provide the required leadership, management and resources to continuously improve the effectiveness of our Quality Management System.
- Train our employees in the needs and responsibilities of Quality Management System; and ensure that the importance of meeting and exceeding customer requirements is communicated and understood throughout our organization.
- Perform all work to a high professional standard with technical and commercial integrity.
- Work closely with our interested parties to deliver world-class products to our customers in a timely manner.
- Communicate our quality objectives and our performance against these objectives to our interested parties.
- Provide a safe and suitable working environment to ensure that activities are safe for our employees, sub-contractors and other interested parties who come into contact with our work.
- Comply with all applicable statutory laws and regulations.
